ABOUT PROJCT

A **radio streaming data controller system** is a centralized platform overseeing the seamless flow of audio content for online radio broadcasting. It manages content ingestion, storage, and distribution, ensuring uninterrupted streaming. The system enables content organization, scheduling, and supports features like analytics and monetization, optimizing the efficiency of radio streaming services.

OUR PROJECT

radio streaming data controller
system sample Over view.

A screenshot of a software interface for a radio streaming data controller. The window has a title bar with three red, yellow, and green buttons. The main content area has a dark background with a green wavy pattern. At the top, there's a header with the text 'AZ INNOVA' and 'Berket Weldahana'. Below this, there are three radio buttons for 'Morning', 'Afternoon', and 'Midnight'. A list of 16 items follows, each with a number and a name, and a corresponding 'Yes' or 'No' radio button. The items are: 1 Transmitter, 2 Live_Studio_Mixer, 3 Live_Studio_pc, 4 Recording_Mixer, 5 Recording_pc, 6 Presenter_pc, 7 Networking, 8 Internet, 9 Live_streaming, 10 Power, 11 Host/CO_Host, 12 Programs, 13 Live_recording, 14 SMS_line, 15 news, and 16 generator. At the bottom, there's a 'Remark:' label and a large black text area. Below the text area are 'Save' and 'Exit' buttons. A footer at the bottom reads '© 2024 © AZ INNOVA WILTA 105.3FM. All Rights Reserved.'A screenshot of a software window titled 'Input Data to PDF'. The window has a dark background with a green wavy pattern. At the top, there's a header with the text 'AZ INNOVA' and 'Berket Weldahana'. Below this, there are three radio buttons for 'Morning', 'Afternoon', and 'Midnight'. A list of 16 items follows, each with a number and a name, and a corresponding 'Yes' or 'No' radio button.
